Key Advantages

- **Cost-effective solutions** offered by 400+ software engineers at competitive rates in Vietnam.
- **Proven track record** with a portfolio of over 800 successful projects across industries and 13 years of experience.
- **Full IP protection** with Saigon Technology, including strict security policies, NDA agreements, and complete ownership transfer upon project completion.
- **Candidates are available for interviews according to your specific needs**, and **a 2-week risk-free trial** to evaluate developers' skills and service quality before making a long-term commitment.
- **A customer-focused approach** combined with Agile methodologies to balance our profits and your benefits, thereby fostering long-term partnerships.
- **Adjustable working hours** and the ability to work diligently despite time zone differences.
- **Five flexible engagement models** catering to different needs, timelines, and budgets.

How do we deliver benefits to you?

- **The strict hiring process** with multiple assessment rounds (Talent Acquisition, Tech Lead, and HR) recruits **top IT talent in Vietnam** across our 3 software development centers.
- **Technology-related training activities** at universities attract young talent, while **continuous training sessions** on English and management skills in our company enhance the competence of the current employees.
- **Developers are fluent in English and familiar with U.S., European, Australian, and Singaporean cultures**, thanks to their experience working with 300+ clients worldwide.
- **Agile and DevOps practices** accelerate delivery, boost collaboration, and drive continuous improvement in software development.
- **Comprehensive expertise** across back-end, front-end, app development, DevOps, and emerging technologies (AI, ML, Blockchain, IoT) has helped us develop 310+ web & mobile app development projects successfully.
- **Compliance with global standards**, including ISO 9001 and ISO 27001, reflects our commitment to security.
- **Transparent operations** and **excellent employee benefits** aim to build client trust.
- **A low turnover rate** and **the Great Place to Work Asia 2023** award demonstrate Saigon Technology's positive work environment.
- **Experienced project managers and tech leads** ensure consistent progress and outstanding project performance.

Vietnam has a large, young, and well-educated population, with a median age of 33.4 years.

A robust IT workforce of 530,000 engineers.

Government investment in IT infrastructure development.

Offering compelling cost advantages.

Why Vietnam?

Boasting a robust education system that prioritizes STEM and IT degrees.

Vietnam's education system includes over 153 institutions that annually produce approximately 50,000 IT graduates.

Investment by Nvidia, IBM, Intel, Samsung, Sony, Renesas, Foxconn, Fujitsu, Canon... to develop high-tech manufacturing.

Our History

2012

Saigon Technology was established with only 3 software engineers, focusing on web, mobile app design and development for Vietnam market.

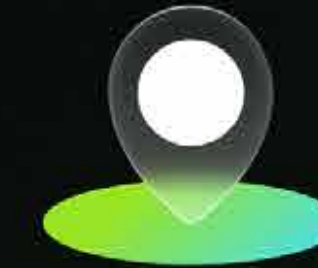

2014

Saigon Technology won the first outsourcing contact from Germany and changed the business strategy to software outsourcing services.

2014 - 2016

We continued to grow up market on outsourcing field to Europe and Australia.

2016 - 2019

Saigon Technology made a big improvement in software development offshoring and outsourcing services when building successfully 50+ offshore dedicated teams for customers in Australia, North America, Singapore, European.

2025 - 2030

Saigon Technology will transform its processes, structure and mindset to reach a new milestone. Our vision is to become Vietnam's leading digital transformation consulting and IT development company, delivering world-class full-stack IT services to clients worldwide.

2023 - 2025

Continue our growth, enhance our process and workforce to provide more affordable and high quality IT development services to clients worldwide.

2021 - 2023

Successfully grow the company to 400+ staff, offices in Vietnam, USA, Australia, Singapore, Switzerland, become a leading software development company in ASIA.

2019 - 2021

Reach to 250+ staffs, clients worldwide, move to the triple size office (total 2,000 square meters), opened a new software development center in Da Nang City, Vietnam in 2020. Those movements mark a new turning point of our growth.

Our People

Thanh Pham - CEO of Saigon Technology

Our CEO strives to deliver successful projects that maximize value for clients by clearly establishing project objectives and risks, controlling programs and costs, and proactively managing project teams. As a software outsourcing consultant, he ensures that every project aligns with industry best practices and meets the highest quality standards.

Although our professionals are from a range of IT Software backgrounds, Mr. Thanh also seeks to ensure that they are multi-disciplined and appreciative of the larger market picture of both the IT Software industry and the Client's business that they are serving.

Mr. Paul Upson
Director of ISMS Global Pty, Australia

As the Owner and Director of ISMS Global, Australia. I understand perfectly how hard it is to find a 'support team' of skilled and professional developers to help grow a system. A few years ago, I found Saigon Technology Software (Mr. Thanh Pham (CEO) and his team) and I have never looked back. STS has single-handedly taken ISMs camp management software from a concept on a napkin to an international product used by major companies around the world. If you are looking for a trusted partner to help you, then you should be talking to Thanh Pham.

Mr. Matt Niemeyer
Managing Director APAC – ISMS Global

Being a customer of Thanh's, from the beginning I have been very impressed with Thanh's professionalism and exceptional customer service. Thanh and his team have always provided me with high-quality work at a very reasonable cost and always within the given time frame. I have no hesitation in recommending Thanh.

Mr. RJ Macasaet
Head of Partnership – DMI Global

I have worked with Thanh on several projects and I admire his professionalism and his dedication to deliver high-quality work. He is responsive when answering emails and calls, as well as making sure that work always gets done on time. I am glad to be working with him and hope to continue working with him.

“ Client Testimonials

Mr. Kirk Duncan
CEO of The Mobile App Man, Sydney, Australia

I had the opportunity to work with Thanh and his team. What a nice experience, though! It could be said that I was really impressed by his professionalism and his team's enthusiasm. They always asked me to check the right demand and to make sure whether each work point was the best option or not. It was my honor to work with such a great team in Vietnam. Hope to meet them soon in the upcoming time!

Mr. Corbin van Amelsvoort
Director at Topicus Vietnam

Over the past year, collaborating with Saigon Technology Solution company, we have brought high-quality financial software solutions. STS helps us meet the strict requirements of the IT market with software engineers, software testers, and internal system control. And all of these are evidence that we have chosen a good software outsourcing partner.

Commitments to Quality

As you visit our website, you can see our slogan, “Your Success is Our Mission”. We are committed to what we say! We try our best to deliver top-quality solutions. Our previous clients rated us as a top performance in efficiency with high-quality work, professionalism, teamwork, creativity, flexibility, punctuality, and unique expertise. It's our honor to be their trusted partner!

National Awards

Global Recognitions

4.8/5 Rating

Strategic Partners

We offer tailored software development solutions with two options, each backed by our commitment to top-quality standards:

Offshore software development

- Access to Vietnam's Top 1% Talent Pool, providing rare and highly skilled resources unavailable locally.
- Data and quality management with ISO standards and NDA contract signing.
- With 13+ years in offshore work, our team excels in English and cross-cultural communication.
- Our PMs and tech leads excel in management and execution.
- Headache-free offshore software development center establishment and ongoing management.
- End-to-end offshore recruitment with tailored hiring support to find the right talent.
- Full control over operations with dedicated offshore software resources.
- Low employee attrition.

Software development outsourcing

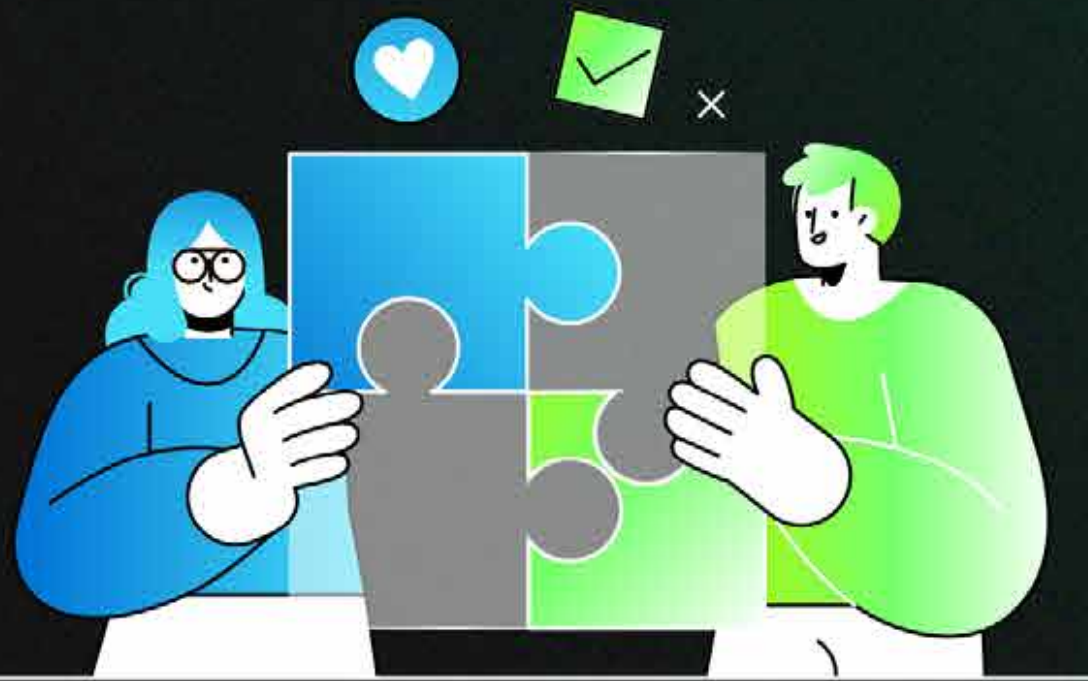

- Cost-Effective Solutions: Rates from \$30 to \$49 per hour.
- Proven expertise in delivering projects across diverse domains.
- Excel with the Fixed-Price model, ensuring cost optimization for clients.
- Providing skilled talent for the entire software development lifecycle.
- Committed to working overtime to meet deadlines.
